

Infants

Ages 6 weeks to 12 months

Infant caregivers at OCE strive to build consistency in a baby's routines and interactions.

Trust and emotional security develop when infants learn that their needs will be met predictably and consistently.

Our teachers at OCE are responsive to your child's cues about their interests and goals as they learn through play, respond to books read aloud, and begin finger plays.

Even daily routines, such as diapering, can be an enriching experience as teachers talk and sing with babies.

Individualized lesson plans are designed for developmentally appropriate learning levels for each infant. Teachers use "baby sign" language to encourage communication before their speech develops.

Daily feedings conform to the parent's guidelines which are discussed with caregivers. This includes transitions to solid foods.

A detailed "Daily Information" sheet is completed throughout the day and includes information on feedings, diapering, napping, and your baby's disposition and daily activities.

Outreach Staff is always here for you and your baby if you have any questions or concerns please feel free to talk with your center's director at any time!
